PROFESSIONAL SUMMARY

Software Engineer with professional experience in developing backend applications using Java and Spring Boot. Experienced in designing RESTful APIs, database-driven applications, and scalable software solutions. Strong foundation in Object-Oriented Programming, Data Structures, Algorithms, System Design, and Cloud fundamentals. Currently exploring AI Agents, Retrieval-Augmented Generation (RAG), and Model Context Protocol (MCP).

SKILLS

- JavaPythonSpring BootREST APIshibernate JPAObjectifyMySQL
- AWSDockersGitGitHubMavenPostmanLinux
- Object-Oriented Programming (OOP)System DesignDistributed SystemsMicroservices
- Data Structures & Algorithms

WORK HISTORY

- SOFTWARE ENGINEER**07/2025 to Current
- Picktime
- Develop and maintain backend services using Java and Spring Boot.
 - Design and implement RESTful APIs for business applications.
 - Participate in debugging, testing, and production issue resolution.
 - Collaborate with development teams to deliver product enhancements and new features.
 - Follow software development best practices including code reviews and version control.
- SOFTWARE ENGINEER INTERN**12/2024 to 06/2025
- Picktime
- Assisted in backend application development using Java.
 - Implemented bug fixes and feature enhancements.
 - Collaborated with senior developers to understand software architecture and development workflows.

EDUCATION

- UNIVERSITY COLLEGE OF ENGINEERING NARASARAOPET**04/2023
- Bachelor Of Technology (B.Tech)**, Electronics & Communication Engineering
- GPA: 6.75 / 10

PROJECT

- **Travel Booking Platform, Java, Spring Boot, React, MySQL:** Developed a travel booking platform supporting travel packages, Bus booking, Ride Sharing. Designed RESTful APIs for package management, booking workflows, user authentication, and itinerary handling. Implemented role-based access control for administrators and customers. Designed relational database schemas for travel packages, bookings, destinations, and user management. Built a scalable backend architecture using Spring Boot and MySQL.
- **LinkedIn Job Fetcher, Python:** Developed an automated job discovery platform for collecting and processing job opportunities. Implemented filtering mechanisms based on skills, experience level, role, and location.
- **MCP Terminal Server & Client, Python, MCP:** Developed a Model Context Protocol (MCP) server exposing terminal operations through standardized tools. Built an MCP client capable of discovering and invoking server tools dynamically. Implemented command execution, response handling, and process interaction through the MCP protocol.
